

## Keynote Speakers (First Day)

(10:30 AM – 11:15 AM)

Kurdistan Hall

---

Biography (1)

Time: 10:30 - 10:55

**Talk Title:** Sustainability and the Built Environment.

### **Ms. Bahar Armaghani**

- Ms. Bahar is the Director of the Sustainability and the Built Environment Program.
- Lecturer in the College of Design, Construction and Planning at University of Florida (UF).
- She is also the Director of University of Florida (UF) Green Building Learning Collaborative. She served as director for thirteen years.
- Under her leadership University of Florida (UF) has always been one of the leading universities in building green.
- Her role in administering university's LEED projects saved the university over \$6 million since the LEED program establishment.
- In 2014, she started LEED Lab at University of Florida bridging the gap between education and operation arms of the university.

Biography (2)

Time: 10:55 – 11:15

**Talk Title:** Feedback and Control Engineering.

**Prof. Dr. Franco Blanchini**

- Dr. Franco was born on 29 December 1959, in Legnano (Italy).
- He is Director of the Laboratory of System Dynamics at the University of Udine.
- He has been involved in the organization of several international events
- He is co-author of the book "Set theoretic methods in control", Birkh\user.
- He is the recipient of 2001 ASME Oil & Gas Application Committee Best Paper Award as a co-author of the article "Experimental evaluation of a High-Gain Control for Compressor Surge Instability".
- He is the recipient of the 2002 IFAC prize survey paper award as author of the article "Set Invariance in Control -- a survey", Automatica, November 1999.

## Keynote Speakers (Second Day)

(9:30 AM – 10:30 AM)

Kurdistan Hall

---

Biography (1)

Time: 9:30 - 10:00

**Talk Title:** Is There an Oikos-Logical Architectural Space  
A Sustainable Way of Building or an Eco-Logical Architecture?

### **Prof. Dr. Marc Belderbos**

- Dr. Marc was born in 1954.
- Professor at the Faculty of Architecture LOCI at the UCLouvain Belgium.
- Dr. Marc Belderbos Studied at the University of Louvain in Belgium. At La Sapienza in Rome Italy.
- After his studies he worked for three years in Paris and in Rome. After this he began his own life of architect where he kept a balance, throughout all his life, between architectural drawings, architectural design, the construction of various buildings, architectural theory and teaching.
- His PhD - The reason of the augury - establishing in the thought the genius of architecting was greeted by various great personalities.
- He has participated in at least 30 international symposiums with numerous keynotes and in many grouped publications.

Biography (2)

Time: 10:00 – 10:30

**Talk Title:** The Salutogenic Architecture-The Search for Healthy Society

**Prof. Dr. Alan Dilani**

- Dr. Alan Dilani is a global authority on interdisciplinary research regarding the interaction between design and health.
- Dilani is a founder of the International Academy for Design and Health (IADH) and the journal, World Health Design.
- He has been engaged worldwide in several universities in the field of Design and Health developing a "Salutogenic Design Program", in both medical and design institutions.
- He holds a Master of Architecture in Environmental Design from the Polytechnic of Turin, Italy
- Ph.D. in Health Facility Design from the Royal Institute of Technology, Stockholm.
- His research center developed at the Karolinska Institute, Medical University, a multidisciplinary research approach, led to a new design theory called "Saltugenic Design" that not only fosters functional efficiency in building infrastructure, but also improves health processes.
- He is the author of 15 books and numerous articles in the field of Design and Health.
- Dr. Dilani has been awarded in 2010 from the American Institute of Architect, Academy of Architecture for Health for his promotion of high quality design research and in 2017 he received the first Fellowship of Academy for Design and Health in the city hall of Vienna.
